## GAMBARAN PENGETAHUAN REMAJA TENTANG DAMPAK SEKS PRANIKAH DI SALAH SATU SMA KOTA TASIKMALAYA

Sofa Februanti

### Abstract

Seks pranikah adalah suatu tindakan melakukan hubungan seks tanpa adanya ikatan pernikahan. Pelaku seks pranikah sebagian besar disebabkan karena kurangnya perhatian orang tua terhadap anak-anaknya yang mulai memasuki usia remaja dan faktor pergaulan yang kurang baik yang dialami oleh remaja. Tujuan dari penelitian ini adalah untuk mengetahui gambaran pengetahuan remaja tentang dampak seks pranikah salah satu SMAN di Kota Tasikmalaya. Metodologi penelitian yang digunakan adalah deskriptif. Sampel diambil dengan teknik simple random sampling yaitu sebanyak 79 responden. Hasil penelitian menunjukan secara keseluruhan tingkat pengetahuan siswa kelas XI tentang dampak seks pranikah dalam kategori cukup 50,8%. Saran diharapkan penelitian ini menjadi masukan bagi pihak sekolah agar lebih meningkatkan pengetahuan siswa-siswi misalnya dengan melalui pemberian informasi terkini dan terbaru (update) mengenai bahaya seks pranikah, dan hendaknya pengawasan pada siswa oleh guru-guru di sekolah tetap dilakukan untuk mengantisipasi perilaku seks yang menyimpang dan diharapkan pentingnya peran orang tua dalam pengawasan terhadap anaknya agar tidak terjebak kedalam arus pergaulan seks pranikah

### Keywords

Pengetahuan, remaja SMA, seks pranikah.

## GAMBARAN TINGKAT PENGETAHUAN TENTANG SEKS BEBAS PADA MAHASISWA TINGKAT I TAHUN AJARAN 2013-2014 FAKULTAS SAINS DAN TEKNOLOGI UNIVERSITAS RESPATI YOGYAKARTA

Riska Megeyanti, Sukmawati Sukmawati, Leli Susanti

### Abstract

**Latar belakang:** Survei Kesehatan Reproduksi Remaja Indonesia (SKRRI) tahun 2012, menyatakan bahwa beberapa perilaku berpacaran remaja yang belum menikah sangat mengkhawatirkan. Sebanyak 29,5% remaja pria dan 6,2% remaja wanita pernah merasa atau merangsang pasangannya. 40,1% remaja laki-laki dan 29,9% remaja wanita pernah berciuman bibir. 79,6% remaja pria dan 71,6% remaja wanita pernah berpegangan tangan dengan pasangannya. Terbatasnya pengetahuan remaja tentang kesehatan reproduksi seperti seks bebas seringkali mengarah pada tindakan seks pranikah. Hasil studi pendahuluan 3 dari 10 responden memiliki tingkat pengetahuan baik, karena mereka mampu menjelaskan dengan baik 2 sampai 3 dari 4 pertanyaan yang diajukan. **Tujuan:** Mengetahui bagaimana gambaran tingkat pengetahuan tentang seks bebas pada mahasiswa tingkat I Fakultas Sains dan Teknologi di Universitas Respati Yogyakarta. **Metode:** Penelitian dilaksanakan di Universitas Respati Yogyakarta. Jenis penelitian ini deskriptif. Subjek penelitian ini adalah mahasiswa Fakultas Sains dan Teknologi Pengambilan data dengan teknik *proposional random sampling*. Pengumpulan data menggunakan kuesioner. Analisa data dengan analisis univariat. **Hasil:** Berdasarkan hasil analisis *univariat*, tingkat pengetahuan mahasiswa Fakultas Sains dan Teknologi sebagian besar sedang (60,5%), dengan karakteristik umur > 22 tahun, berpengalaman seks bebas, dan sebagian besar sudah pernah mendapatkan informasi tentang seks bebas. **Kesimpulan:** Gambaran Tingkat Pengetahuan Tentang Seks Bebas Pada Mahasiswa

Sexual activity and contraceptive use among teenagers in the United States, 2011-2015  
JC Abma, GM Martinez - National health statistics reports, 2017 - europepmc.org  
Objective-This report presents national estimates of sexual activity and contraceptive use among males and females aged 15-19 in the United States in 2011-2015, based on data from the National Survey of Family Growth (NSFG). For selected indicators, data are also presented from the 1988, 1995, 2002, and 2006-2010 NSFGs, and from the 1988 and 1995 National Survey of Adolescent Males, which was conducted by the Urban Institute. Methods-NSFG data were collected through in-person interviews with nationally representative ...

Abstract - Adolescent is defined as a period of transition between the development of childhood and adulthood, which is accompanied by changes in the biological, cognitive, and socio emotional. Premarital sexual behavior is any behavior that is driven by sexual desire with the opposite sex before marriage. The incidence of premarital sexual behavior in adolescents is likely to increase every year this is caused by several factors, one of which is the lack of knowledge about sex education, which is one component that can form premarital sexual behavior. This study aims to determine the relationship of adolescent knowledge about sex education with sexual behavior in adolescents at SMA Pasundan 1 Bandung. This study uses a quantitative research design with a model in which the correlation of total population of 602 people and a large sample of 20% of the total population of 139 respondents in order to obtain the result. This research sampling method is simple random sampling and analyzed using Spearman rank correlation. Collecting data in this study using a questionnaire. These results indicate that the majority of respondents 84.6% had good knowledge, a fraction of 15.4% of respondents have sufficient knowledge, and none of the respondents 0% have less knowledge. In addition, most respondents 86% are not at risk of sexual behavior and 14% of respondents fraction risky sexual behavior. Analysis results obtained  $p < 0.01$  and the value of  $r_s$  0,55311 also means that as many as 58% of premarital sexual behavior is influenced by knowledge of sex education and the rest influenced by other factors outside the study. In this study concluded that there is a relationship between knowledge about sex education with sexual behavior in adolescents at SMA Pasundan 1 Bandung, therefore institutions must prepare positive activities for youth such as counseling about sex education.
