Concentration : Information Systems

States that the Thesis with the following title:

EVALUATION OF PES 2021 GAME PERFORMANCE USING THE NDFA METHOD

Supervisor : Arbansyah, S.Kom., M.TI

1. This paper is ORIGINAL and has NEVER been submitted for a Bachelor of Computer degree, either at the University of Muhammadiyah East Kalimantan (UMKT) or at other universities
2. This paper is my own ideas, formulations and research, without the help of other parties except the direction of the Supervisor
3. In this paper there is no work or opinion of any other person, unless in writing it is clearly stated as a reference in the manuscript with the name of the author mentioned and mentioned in the Register Library on this paper
4. The software used in this study is entirely my responsibility, not the responsibility of the University of Muhammadiyah East Kalimantan (UMKT)
5. This statement I make in fact, if in the future there are irregularities and untruths in this statement, then I am willing to accept ACADEMIC SANCTIONS with the revocation of the degree which has been obtained, as well as other sanctions in accordance with the norms in force at Muhammadiyah University.

INTRODUCTION

Alhamdulillah, by expressing praise for the presence of Allah SWT, because with His instructions this thesis with the title "evaluation of the performance of the pes 2021 game using the ndfa method" can be the author complete it on time, as one of the requirements for completing lecture assignments and to achieve the graduation requirements of the University of Muhammadiyah East Kalimantan Samarinda.

All the shortcomings in writing this thesis are very much realized by the author, but with moral and material assistance from various parties, all completeness can be fulfilled in writing. For this reason, on this occasion, the author should express his highest gratitude and appreciation to various parties who have directly or indirectly been provide his help.

1. Mr. Prof.Dr.Bambang Setiaji as the rector of the University of Muhammadiyah East Kalimantan, and Prof. Ir. Sarjito, M.T., Ph.D as dean of the Faculty of Science and Technology, University of Muhammadiyah, East Kalimantan, has been pleased to provide an opportunity for the author to complete his studies at the University of Muhammadiyah East Kalimantan.
2. Mrs. Asslia Johar Latipah,S. Kom., M.Cs as the head of the Informatics Engineering study program.
3. Mr. Arbansyah, S.Kom., M.TI as a supervisor who has provided input guidance and suggestions that are very helpful in perfecting this thesis.
4. All lecturers of the Informatics Engineering study program and all lecturers at the University of Muhammadiyah East Kalimantan who have provided a lot of knowledge to the author so that they can complete thesis writing as one of thesis requirements for obtaining a bachelor's degree in computer science.

5. His beloved parents and siblings who always give affection, do'a, advice, as well as for his extraordinary patience face in every step of the author's life, which is the greatest gift in life.
6. Colleagues in the Informatics Engineering study program at the University of Muhammadiyah, East Kalimantan, who have provided a lot of thought and motivation assistance until the author can complete it.

Writer

ABSTRACT

In this study, non-deterministic finite automata (NFA) were used to design the pro evolution soccer 2021 (PES 2021) game model, the PES 2021 game is a real simulation of the sport of football by using game controls to play or controlling player activity. Game controls are presented as symbols until each game character has different characteristic behaviors. An evaluation is carried out after the analysis of the game and can be presented on the digraph using the NFA model to define the transition function.

Keywords: Non-deterministic finite automata (NFA), pro evolution soccer 2021 (PES2021), Evaluation
