Rini Ernawati (Correspondence Author):

We have reached a decision regarding your submission to Advances in Decision Sciences, "The Effectiveness of Web-based Audiovisual Media Application in Monitoring Children's growth to Prevent Stunting".

Our decision is to: "Accepted with Minor revision"

You are encouraged to revise and resubmit as new submission.

Review comments:

I find the findings are interesting. I have the following comments for the authors to improve their paper:

- 1) The authors should state the motives of their study and tell readers why their study is important and useful to academics and practitioners. They should also state clearly their contributions to the literature in the introduction section.
- 2) The authors should include a literature review section to discuss all important works and pioneer works and some of the recent studies related to their study.
- 3) Data (sub)section is too brief. The authors should discuss the data in detail.
- 4) The variable (sub)section is too brief. The authors should discuss the variables being used in detail.
- 5) The authors should include the methodology section properly.
- 6) The authors should put in some equations properly.
- 7) The empirical analysis section is too brief. The authors should conduct their analysis and put the results in tables and discuss the results properly in their paper.

- 8) the presentation in the paper is poor. The authors should improve the presentation greatly.
- 9) The conclusion section is too brief. They should discuss clearly the motives of their study, tell readers why their study is important and useful to academics and practitioners, state clearly their contributions to the literature in the conclusion section. They should point out the limitations of their approach and suggest directions for further study.
- 10) There are many typos and structure problems. The authors should polish their paper greatly.
- 11) There are too few references. The authors should include more related references in their paper.

Please note:

- 1. ADS journal will not accept any similarity of more than 15% of any published paper.**
- 2. We will treat your resubmission as new submission.**
- 3. Please include your reply to reviewer in your submission.**

Yours sincerely

Responses to Reviewers' Comments

The line numbers may be changed during the submission process; hence, we have used location descriptors to identify where in the text we have made the changes

Reviewer

Number	Comments and Questions	Response
1	Author/s have mixed introduction and literature review section. Please separate both sections and in the introduction section only discuss the area of research in general and explain the study objectives.	Thank you for your comment. We have highlighted this in our manuscript, please refer to tracked LITERATURE REVIEW page 2.
2	Add separate section for "Literature review" In the literature review section, author/s can discuss past research findings. Please cite to provide current picture about Stunting and its Psychological Impact on Retired Elders.	A LITERATURE REVIEW has been added and separate section Please refer to tracked version in page 3. We have already change latest literature from 2016-2020 and follow your advice.
3	Please add separate section for " <i>Data extraction and synthesis</i> " "Quality assessment" "Study selection" "statistical methods" and name it as "Methodology".	A METHODOLOGY has been added, We have highlighted this in our manuscript. Please refer to tracked version in page 5.
4	In the method section, please explain exclusion criteria of the of the past studies.	This point has been addressed in the METHOD SECTION. Please refer to tracked version METHOD SECTION, sentence beginning with "Editorials, systematic reviews, literature reviews, proceeding letters, conference abstracts, and non-peer reviewed journals were excluded".

5	Please clearly discuss the study implication after the discussion. Please explain how findings of this study contribute towards theory and practice.	This point has been added after IMPLICATION. We have highlighted this in our manuscript,. Please refer to tracked version in page 24.
6	Please make separate headings for study limitations after the implications section and discuss the study limitations and based on these limitations, please propose future research directions.	A LIMITATION has been added, we have highlighted this in our manuscript. Please refer to tracked version in page 24.
7	Please request native English speaker to do language editing of this paper. Currently there are many grammatical and structural errors are in the paper which makes this paper difficult to read and understand.	This Point, We will send certificate English proof read
8	Please reduce the word limit and make it between 6000-8000 maximum.	This point, We have separated APENDIX . Methodological quality of included studies Joana Brings checklist and keyword search tool into different folder

Review comments:

I read the paper and reports, I find the authors have revised their paper to address all the comments raised by the reviewers and the paper is of good quality. I have the following comments for the authors to address before we accept their paper:

- 1) The authors should point out all the contributions of their paper to the literature in the introduction and conclusion Sections and abstract clearly,
- 2) cite some important, especially recent papers in their area and cite some related papers in Decision Sciences, WEB-BASED AUDIO-VISUAL
