

## **CHAPTER V**

### **CONCLUSION AND SUGGESTIONS**

In this chapter, the researcher presents the conclusion and suggestions following the findings of the study. The first section is the conclusion of the finding and the second is the suggestion dealing with the objectives of future researcher and student.

#### **5.1 CONCLUSION**

The objective of this study is to know students' perceptions of using learning management system (LMS) in hybrid class in junior high school and the challenges for students of using learning management system (LMS) in hybrid class in junior high school.

Based on the research findings and discussion above, the researcher concluded that using LMS media in online learning is not only beneficial but also successful for students because they find it difficult to understand and because they are unable to discuss the assignment directly with friends, particularly for Islamic boarding school students who are needed to learn Arabic.

They employ numerous online platforms available during online learning, such as Google Classroom, Zoom, YouTube, and WhatsApp, for LMS. However, WhatsApp is now the most active or commonly used online platform because, in addition to being simple to use, it allows students to connect directly with their

lecturers. Furthermore, the usage of LMS poses various issues or challenges for students who utilize it, such as intermittent internet problems, difficult to understand the material, assignment deadlines that are too short, and emotions of lazy that develop when online learning via LMS takes place.

Based on the findings above, Students have their own perspectives and challenges when it comes to LMS in hybrid class, such as learning in LMS is rough and not efficient, internet connection become the main issue when using LMS, and also it is hard to understand the material provided by teacher.

## **5.2 SUGGESTIONS**

### **5.2.1 For Future Researcher**

The researcher would like to suggest other researchers to conduct further studies on this topic. Future researcher may investigate the same title, but with different data, for example: future researcher might investigate or take data in different Junior High School' thesis conclusion, so that the result will be more advance. In addition, it will be interesting to compare the Junior High School student' that uses Islamic boarding school, thesis conclusion and regular Junior High School students' thesis conclusion in terms of the students' perception and students' challenges.

### **5.2.2 For Student**

The researcher recommends that students, particularly junior high school pupils, understand and learn more about technology. Because the years pass, the use of technology becomes increasingly crucial in carrying

out various operations. In this situation, the education sector is no exception, since the LMS platform is one of the technologies that will continue to exist long after the COVID-19 epidemic has passed. As a result, by actively mastering technology, students may avoid feeling lazy, uninterested, and unable to utilize LMS properly.
